

5X5

5X5 is a word game for 2 or more players.

1. To start you need to create the game grid (below). Make a grid that has 6 columns and 6 rows. Each player needs a grid.
2. Leave the upper left-hand corner blank. Fill in the first column of the grid with categories you want. Then fill in the first row of the grid with five different letters.
3. Set a time limit of one or two minutes. Signal when to start and then everyone fills in as many boxes as they are able during the time limit.
4. When time is up stop and compare answers. Compare answers for the first row. If someone else has the same answer that you have for a letter, you get zero points. If no one has the same answer as you, you get one point.

Do the same for the rest of the rows. When you are finished, add all of your points. The person with the most points wins.

You can do this over and over again with different categories and letters, or use the same categories and letters as before and think of different answers.
